

Eye Melanoma Market Size, Share, Revenue, Trends And Drivers For 2024-2033

The Business Research Company's Eye Melanoma Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

LANDON, GREATER LANDON, UK, June 24, 2024 /EINPresswire.com/ -- The global [eye melanoma market](#), focused on a rare but serious form of cancer affecting the eye's melanocytes, is on a

trajectory of significant growth. It is projected to expand from \$8.29 billion in 2023 to \$9.1 billion in 2024, with a compound annual growth rate (CAGR) of 9.8%. This growth is primarily attributed to heightened awareness and early detection efforts, the aging population, and increased sun exposure leading to a rise in skin cancer incidence. These factors, coupled with the development of targeted therapies and robust patient advocacy and support programs, are driving market expansion.

Rising Prevalence of Eye Cancer Drives Market Growth
The eye melanoma market is expected to witness strong growth in the coming years, reaching \$12.61 billion by 2028, with a CAGR of 8.5%. This growth can be attributed to continued public health initiatives, research in genetic

and molecular profiling, and global aging population trends. With the emergence of targeted therapies and advancements in treatment modalities, the market is witnessing trends such as the integration of artificial intelligence (AI), focus on rare disease drug development, and patient-centric drug approval processes.

The increasing prevalence of eye cancer, with 3,490 cases reported in 2023 according to the American Cancer Society, is a key driver for market growth. This trend underscores the need for specialized therapies and interventions, supported by improved detection methods, increased awareness, and advancements in treatment options.

Key Players and Market Trends

Major companies in the eye melanoma market, including Pfizer Inc., Johnson & Johnson, and F. Hoffmann-La Roche Ltd., are focusing on developing innovative and specialized treatments to enhance patient outcomes. Immunotherapies and targeted therapies are at the forefront of these efforts, offering a precision-driven approach to cancer treatment. For instance, Immunocore Ltd.'s Kimmtrak (tebentafusp-tabn) received FDA approval in January 2022 as the first therapy for individuals with unresectable or metastatic uveal melanoma (mUM). Kimmtrak is an immunotherapy that targets a specific protein called gp100, engaging specialized immune cells through engineered T-cell receptors.

Market Segmentation

The eye melanoma market is segmented by site (uvea, sclera, retina), diagnosis (imaging, biopsy, eye exam), treatment (surgery, radiation therapy, targeted therapy, immunotherapy, other treatment), and end user (hospitals and clinics, academic institutes).

Geographic Insights

North America led the market in 2023, with Asia-Pacific expected to be the fastest-growing region in the forecast period. The comprehensive report provides detailed insights into regional dynamics, market trends, and growth opportunities.
