

Niemann-Pick Disease Type C Market Forecasted to Surge in Coming Years, 2024-2034 Analysis by DelveInsight

The Niemann-Pick Disease Type C market size was valued ~34 million in 2022 and is anticipated to grow with a rapid CAGR during the study period (2020-2034).

NEVADA, LA, UNITED STATES, June 24, 2024 /EINPresswire.com/ --

DelveInsight's "Niemann-Pick Disease Type C Market Insights, Epidemiology, and Market Forecast-2034" report

offers an in-depth understanding of the Niemann-Pick Disease Type C,

historical and forecasted epidemiology

as well as the Niemann-Pick Disease Type C market trends in the United States, EU4 (Germany, Spain, Italy, France) the United Kingdom and Japan.

Niemann-Pick Disease Type C Market

Some of the key facts of the Niemann-Pick Disease Type C Market Report:

The Niemann-Pick Disease Type C market size was valued ~34 million in 2022 and is anticipated to grow with a significant CAGR during the study period (2020-2034)

The market size for Niemann-Pick Disease Type C (NPC) in the US was USD 9 million in 2022.

According to DelveInsight's analysis, the market is expected to grow due to the rising prevalence of the disease.

DelveInsight's analysis shows that the market size for Niemann-Pick Disease Type C in the EU-4 and the UK was around USD 23 million in 2022. This market is projected to grow during the forecast period from 2023 to 2034.

According to DelveInsight's analysis, there were 787 diagnosed prevalent cases of Niemann-Pick Disease Type C in the 7MM in 2022, with a projected increase in cases expected during the forecast period of 2023 to 2034.

In 2022, the EU4 countries and the UK accounted for 328 cases of Niemann-Pick Disease Type C.

Among these countries, Germany had the highest number of diagnosed prevalent cases, with 84 cases, representing 26% of the total in these four European nations. This number is expected to rise during the study period from 2020 to 2034.

In 2022, Spain had the lowest number of diagnosed prevalent cases of Niemann-Pick Disease Type C among the EU4 countries.

The diagnosed prevalent cases of Niemann-Pick Disease Type C in the 7MM differed by gender, with females having higher numbers than males. According to DelveInsight's analysts, there were 433 diagnosed prevalent cases in females and 354 in males in 2022. These numbers are expected to increase during the forecast period from 2023 to 2034.

According to DelveInsight's analysts, Japan had 37 diagnosed prevalent cases of the juvenile type (ages 6 to under 15) of Niemann-Pick Disease Type C in 2022.

In 2022, the market size for Niemann-Pick Disease Type C (NPC) in Japan was USD 2 million, representing 6% of the total market size across the 7MM. It is anticipated to increase by 2034.

Key Niemann-Pick Disease Type C Companies: Zevra Therapeutics, Azafaros A.G, IntraBio, Cyclo Therapeutics, Azafaros A.G., and others

Key Niemann-Pick Disease Type C Therapies: Arimoclomol, AZ-3102, IB1001, N-Acetyl-L-Leucine, Hydroxypropyl-beta-cyclodextrin, AZ-3102, and others

The Niemann-Pick Disease Type C epidemiology based on gender analyzed that Niemann Pick Disease Type C is more prevalent in females than in males

The Niemann-Pick Disease Type C market is expected to surge due to the disease's increasing prevalence and awareness during the forecast period. Furthermore, launching various multiple-stage Niemann-Pick Disease Type C pipeline products will significantly revolutionize the Niemann-Pick Disease Type C market dynamics.

Niemann-Pick Disease Type C Overview

Niemann-Pick Disease Type C (NPC) is a rare, inherited, neurodegenerative disorder characterized by the abnormal accumulation of lipids (fats) in various tissues of the body, particularly in the brain, liver, and spleen. This accumulation is due to mutations in the NPC1 or NPC2 genes, which are responsible for regulating the transport of cholesterol and other lipids within cells. These mutations disrupt the normal processing and movement of lipids, leading to their buildup and subsequent cellular dysfunction and damage.

Niemann-Pick Disease Type C Epidemiology

The epidemiology section provides insights into the historical, current, and forecasted epidemiology trends in the seven major countries (7MM) from 2020 to 2034. It helps to recognize the causes of current and forecasted trends by exploring numerous studies and views of key opinion leaders. The epidemiology section also provides a detailed analysis of the diagnosed patient pool and future trends.

Niemann-Pick Disease Type C Epidemiology Segmentation:

The Niemann-Pick Disease Type C market report proffers epidemiological analysis for the study period 2020–2034 in the 7MM segmented into:

Total Prevalence of Niemann-Pick Disease Type C

Prevalent Cases of Niemann-Pick Disease Type C by severity

Gender-specific Prevalence of Niemann-Pick Disease Type C

Diagnosed Cases of Episodic and Chronic Niemann-Pick Disease Type C

Niemann-Pick Disease Type C Drugs Uptake and Pipeline Development Activities

The drugs uptake section focuses on the rate of uptake of the potential drugs recently launched in the Niemann-Pick Disease Type C market or expected to get launched during the study period. The analysis covers Niemann-Pick Disease Type C market uptake by drugs, patient uptake by therapies, and sales of each drug.

Moreover, the therapeutics assessment section helps understand the drugs with the most rapid uptake and the reasons behind the maximal use of the drugs. Additionally, it compares the drugs based on market share.

The report also covers the Niemann-Pick Disease Type C Pipeline Development Activities. It provides valuable insights about different therapeutic candidates in various stages and the key companies involved in developing targeted therapeutics. It also analyzes recent developments such as collaborations, acquisitions, mergers, licensing patent details, and other information for emerging therapies.

Niemann-Pick Disease Type C Therapies and Key Companies

Arimoclomol: Zevra Therapeutics

AZ-3102: Azafaros A.G

IB1001: IntraBio

N-Acetyl-L-Leucine: IntraBio Inc

arimoclomol: ZevraDenmark

Hydroxypropyl-beta-cyclodextrin: Cyclo Therapeutics

AZ-3102: Azafaros A.G.

Niemann-Pick Disease Type C Market Drivers

Advances in genetic testing and diagnostic technologies

Increasing awareness and improved disease identification

Rising prevalence of NPC globally

Growing research and development initiatives for novel therapies

Supportive regulatory environment facilitating drug approvals

Expansion of healthcare infrastructure and accessibility

Niemann-Pick Disease Type C Market Barriers

Limited understanding of disease mechanisms and variability

High costs associated with treatment and care

Challenges in early diagnosis and screening

Limited therapeutic options and efficacy of current treatments

Regulatory complexities in drug development and approval

Accessibility issues in healthcare systems, especially in developing regions

Scope of the Niemann-Pick Disease Type C Market Report

Study Period: 2020–2034

Coverage: 7MM [The United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and Japan]

Key Niemann-Pick Disease Type C Companies: Zevra Therapeutics, Azafaros A.G, IntraBio, Cyclo Therapeutics, Azafaros A.G., and others

Key Niemann-Pick Disease Type C Therapies: Arimoclomol, AZ-3102, IB1001, N-Acetyl-L-Leucine, Hydroxypropyl-beta-cyclodextrin, AZ-3102, and others

Niemann-Pick Disease Type C Therapeutic Assessment: Niemann-Pick Disease Type C current marketed and Niemann-Pick Disease Type C emerging therapies

Niemann-Pick Disease Type C Market Dynamics: Niemann-Pick Disease Type C market drivers and Niemann-Pick Disease Type C market barriers

Competitive Intelligence Analysis: SWOT analysis, PESTLE analysis, Porter's five forces, BCG Matrix, Market entry strategies

Niemann-Pick Disease Type C Unmet Needs, KOL's views, Analyst's views, Niemann-Pick Disease Type C Market Access and Reimbursement
