Definition:

Pharmacovigilance outsourcing refers to the practice of contracting out activities related to pharmacovigilance, which is the science and activities related to the detection, assessment, understanding, and prevention of adverse effects or any other drug-related problems. In the context of the pharmaceutical and healthcare industry, pharmacovigilance outsourcing typically involves delegating specific tasks or the entire pharmacovigilance process to external service providers or organizations.

Market Drivers:

Increasing complexity of regulatory requirements

Growing volume of adverse event data that pharmaceutical companies

Market Opportunities:

The integration of advanced technologies like Artificial intelligence (AI), machine learning, and natural language processing (NLP)

Market Leaders & Development Strategies:

On 26th April 2021, the pharmaceutical industry-focused company Ergomed plc announced that its PrimeVigilance division, a leader in the world of pharmacovigilance and medical information services, has opened a new legal entity and regional office in Japan. Based in Tokyo, the new subsidiary business operates under the name PrimeVigilance Japan KK and provides a full suite of pharmacovigilance services, including a specific Japanese safety database. Comprehensive medical information services in Japanese are also offered.
