

# The Fishing Drones Market Size - \$0.89 Billion In 2024

*The Business Research Company's Fishing Drones Global Market Report 2024 - Market Size, Trends, And Global Forecast 2024-2033*

LONDON, GREATER LONDON, UK, June 25, 2024 /EINPresswire.com/ -- The [fishing drones market](#) is projected to grow from \$0.79 billion in 2023 to \$0.89 billion in 2024, at a CAGR of

12.5%. The market's remarkable expansion is attributed to the growing demand for sustainable fishing practices, regulatory support for remote monitoring, and increasing adoption of unmanned aerial vehicles. By 2028, the market size is expected to reach \$1.41 billion, with a CAGR of 12.2%, driven by advancements in hybrid and solar-powered drones, transparent seafood supply chains, and the evolution of multi-sensor payloads.

**Rising Demand for Aquaculture Fuels Market Growth**  
The increasing demand for aquaculture significantly boosts the fishing drones market. Aquaculture, the practice of cultivating and harvesting aquatic animals under controlled conditions, is expanding due to rising seafood demand and declining wild fish stocks. Fishing drones

enhance operational efficiency and sustainability in aquaculture. According to the Food and Agriculture Organization, aquaculture production is expected to reach 106 million metric tons by 2030, a 22% increase from 2020 levels. This surge in aquaculture demand propels the fishing drone market forward.
