By offering innovative outsourcing services, Acquaint Softtech brings its specialized expertise in various technologies for the benefit of your business. Businesses from several industries can benefit from creative solutions that are easy to scale and also cost-effective.

Real success stories on how Acquaint Softtech has helped companies from several industries save a substantial amount on software development costs.

How the Big Firms Saved With Their Smart Decision To Outsource To Acquaint Softtech:

Proptech Pioneer: A leading real estate management company, Great Colorado Homes partnered with Acquaint Softtech to develop a comprehensive property management system. The solution streamlined operations, reduced manual tasks, and improved tenant satisfaction, leading to an increase in operational efficiency. This project spanned over 24 months saving the company over $643,200 overall.

Edutech Excellence: Real School, an educational institution, collaborated with Acquaint Softtech to create a virtual classroom platform that enhanced online learning experiences. The platform supported thousands of students globally, reducing administrative overhead. It saved the institution over $257,280 in operational costs for this 1 year project.

Fintech Frontier: A client with a fintech project, Superfi engaged Acquaint Softtech to build a secure and scalable financial application. The application's robust features and compliance with industry standards ensured smooth operations. It was well received by the users in the first year itself. The firm was able to save over $257,000 in development costs.

eCommerce Expansion: Elite, an online retail company, sought Acquaint Softtech's expertise to develop a B2B eCommerce platform from scratch. The new platform improved user experience, increased conversion rates. It saved the company over $771,840 overall in this

On-demand Expansion: Another success story features our collaboration with a ride-hailing company, where we developed a robust, scalable application that optimized driver dispatch and

reduced wait times. This involved creating a cutting-edge taxi app for Tryo Technologies. This app integrates real-time GPS tracking, dynamic fare calculation, and seamless payment integration, which significantly enhances the user experience. This project boosted the company's operational efficiency but also increased customer satisfaction and retention. Tyro Technologies ended up saving over $385,920.
