

# RefillGenie Now Refilling Inhalers for Asthmatics Across the US

*The text-based telehealth service now offers albuterol refills to support asthma patients across the United States.*

JERSEY CITY, NEW JERSEY, UNITED STATES,  
June 25, 2024 /EINPresswire.com/ --

[RefillGenie](#), a leading telehealth provider for medication refills, is pleased to announce the expansion of its services to include albuterol inhaler refills for patients across the United States with a diagnosis of asthma. This addition allows RefillGenie to provide even more essential medications to patients who may struggle to access timely refills through traditional channels.

Albuterol is a short-acting bronchodilator, a medication that relaxes the muscles in the airways, making it easier to breathe. It is a critical medication for people with asthma, as it can help relieve sudden asthma symptoms and prevent asthma attacks.

“We are committed to removing barriers to healthcare and ensuring that everyone has access to the medications they need to manage their chronic conditions,” says Dr. Stephen Kelly, Founder of RefillGenie. “By adding albuterol inhalers to our list of refillable medications, we can help people with asthma stay healthy and avoid the complications of uncontrolled asthma.”

RefillGenie offers a convenient and secure platform for patients to request medication refills. Through a text-based system, patients can connect with a licensed physician who will review their medical history and current medication needs. If appropriate, the doctor can authorize a refill for a limited period, allowing patients time to secure a follow-up appointment with their primary care physician.

“RefillGenie was a lifesaver for me,” says Chrystal B, a satisfied RefillGenie customer. “I contacted them in the evening and got same-day service within 20 minutes. They were professional, courteous, and affordable. I highly recommend their service.”

Here are some of the benefits of using RefillGenie for albuterol inhaler refills:

- Convenience: Request refills anytime, anywhere, from your phone.

- Fast and Easy: Get refills approved within minutes.
- Affordable: Pay a flat fee per refill, with no hidden costs.
- Safe and Secure: HIPAA-compliant platform protects your personal health information.

“This was a very pleasant experience,” says Toby S, another RefillGenie customer. “The doctor just needed a few questions answered and proof of ID. The entire process was complete within 2 hours. Seamless and efficient!”

RefillGenie emphasizes that while it serves as a temporary resource to bridge gaps in care, it does not intend to replace primary care doctors. The company encourages patients to re-establish care with a local provider for regular physical exams and long-term health management.

RefillGenie is not an online pharmacy. It is a telehealth platform where customers can interact with a board-certified physician via encrypted text chat; if approved, the physician sends a prescription for a refill of an existing medication. Proof of a previous prescription is required. To learn more about RefillGenie's services, visit the company website at [RefillGenie.com](https://RefillGenie.com) or call +1 (929)-274-3052. ###

## About RefillGenie

The physician founders of RefillGenie were tired of seeing patients suffer from strokes and heart attacks simply because they were unable to refill their blood pressure medication. For that reason, they created a simple, text-based service to ensure anyone can access their life-saving medications, even when in-between doctors or insurance plans.

## Contact Details:

344 Grove St Unit 876  
Jersey City, NJ 07302  
United States

## Note to Editors

RefillGenie is a telehealth company that provides medication refill services to patients in 33 states across the USA. The company was founded by Dr. Stephen Kelly and is headquartered in Jersey City, New Jersey. RefillGenie's mission is to remove barriers to medication access and ensure patients can easily manage their health, even during times of uncertainty or transition.

The company offers a user-friendly, text-based service with transparent pricing and direct communication with licensed physicians. While RefillGenie does not intend to replace primary care doctors, it serves as a temporary resource to bridge gaps in care and prevent complications from conditions like diabetes and hypertension.
