

## QuaerisAl and BARC release research report on Conversational Queries

Read this research report for insights into why Conversational Queries are needed for better experiences for business users.

NEW YORK, NY, USA, June 25, 2024 /EINPresswire.com/ -- QuaerisAl, a cutting-edge Generative Al platform company, is pleased to announce the publication of a research report done by BARC on conversational queries. The case for democratizing data consumption is more critical than ever. This report explains what conversational queries are and how

they work, as well as why companies need to add conversational query tools to empower business users.

QuaerisAl, a conversational query platform, offers an intuitive, search-driven user experience,

Conversational Queries are critical for questions whose half-life is 2 seconds, and we all have 100s of such questions."

Rishi Bhatnagar

which enables actioning and decision-making on data for all business users. The core Natural Language engine is driven by QuaerisAl's proprietary language models, ensuring your data isn't exposed to LLMs. QuaerisAl also supports 'Bring Your Own Model', so if you have credits available for Microsoft's OpenAl, Google, or Mistral, you can use them with QuaerisAl. QuaerisAl promises to improve experience and productivity of business users and executives several fold and offering unlimited user

licensing models.

Shawn Rogers, CEO of BARC US, stated that "Empowering business leaders with data driven insights has never been more crucial. This research brief helps explain why democratizing access via GenAl technology and conversational queries eliminates roadblocks and enables real-time insights, transforming the way businesses operate and thrive."

"We are thrilled to partner up with BARC for this research as it addresses significant whitespace in the data marketplace." said Rishi Bhatnagar, CEO & Co-Founder of QuaerisAI. "Conversational Queries are critical for questions whose half-life is 2 seconds, and we all have 100s of such questions."
