## Strong Future Growth Anticipated

The urinary catheters market is projected to continue its strong growth, reaching \$7.58 billion in 2028 at a compound annual growth rate (CAGR) of 7.9%. The growth in the forecast period can be attributed to the aging population, increasing emphasis on infection control, growing healthcare expenditure, shift towards minimally

invasive procedures and telemedicine, and remote patient monitoring.

## Growth driver of the urinary catheters market

The rising occurrence of chronic illnesses is expected to propel the growth of the urinary catheter market going forward. Chronic illnesses refer to long-term health conditions that persist over an extended period, often requiring ongoing management and treatment as they are generally not curable. The occurrence of chronic illnesses is due to aging population, unhealthy lifestyles, and the accessibility and infrastructure of healthcare. Urinary catheters are vital in

### Major Players and Market Trends

Key players in the urinary catheters market include Medtronic PLC, Becton Dickinson and Company, Boston Scientific Corporation, Medline Industries Inc., B. Braun Melsungen AG.

Major companies in the urinary catheter market are developing innovative products, such as foley catheter fixation, to enhance patient comfort and reduce complications. Foley catheter fixation refers to a medical apparatus designed to secure a Foley catheter to prevent movement or accidental displacement. These devices typically include adhesive pads or straps that attach to the patient's skin and clips or mechanisms to hold the catheter securely.

### Segments:

- 1) By Type: Coated Catheters, Uncoated Catheters
- 2) By Application: Benign Prostate Hyperplasia And Prostate Surgeries, Urinary Incontinence, Spinal Cord Injury, Other Applications
- 3) By End-User: Hospital, Clinics, Long-Term Care Facilities, Other End-Users

### Geographical Insights: North America Leading the Market

North America was the largest region in the urinary catheters market in 2023. Asia-Pacific is expected to be the fastest-growing region during the forecast period, driven by expanding healthcare facilities and increasing awareness of the benefits of urinary catheters.

### Urinary Catheters Market Definition

Urinary catheters are medical devices used to drain urine from the bladder when a person is unable to do so naturally. These tubes are inserted into the bladder through the urethra or a small surgical opening in the abdomen. Urinary catheters are commonly used in various medical situations for patients with urinary retention or incontinence or those who are bedridden and unable to use a toilet.
