

Intermittent Pneumatic Compression (IPC) Devices Market Overview: Market Trends, Strategies, And Opportunities

The Business Research Company's Intermittent Pneumatic Compression (IPC) Devices Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

LONDON, GREATER LONDON, UK, June 26, 2024 /EINPresswire.com/ -- The intermittent pneumatic compression (IPC) devices market has witnessed

rapid growth in recent years, driven by

advancements in disease management and increased healthcare access. Starting at \$1.31 billion in 2023, the market is projected to reach \$1.44 billion in 2024, growing at a compound annual growth rate (CAGR) of 10.0%. This growth in the historic period can be attributed to improved disease understanding, increased awareness and diagnosis, changing healthcare policies,

collaborations in clinical trials, and supportive patient advocacy.

Key Players and Market Trends

Major companies such as Cardinal Health Inc., Medtronic PLC, and Stryker Corporation are intensifying their efforts in developing innovative IPC devices. For instance, the introduction of

wearable IPC devices, like the Fist Assist Model FA-1 by Fist Assist Devices LLC, signifies a shift towards more user-friendly and automated solutions. These innovations aim to improve circulation and prevent conditions like deep vein thrombosis (DVT), particularly in patients with limited mobility.

Market Segments

- Type: Deep Vein Thrombosis (DVT), Pulmonary Embolism (PE)
- Distribution Channel: Clinics, Pharmacies, Online Channels, Other Offline Channels
- Application: Home Use, Hospital

Regional Insights: North America Leads the Market

North America dominated the IPC devices market in 2023, attributed to well-established healthcare infrastructure and high adoption rates of advanced medical technologies.
