Growing Prevalence of Obesity and Diabetes Fuels Market Growth

The increasing rates of obesity and diabetes are key drivers of the IHD drugs market. These conditions significantly elevate the risk of developing ischemic heart disease. The World Obesity Federation forecasts a dramatic rise in obesity rates by 2035, with the number of people living

with obesity expected to hit 2.7 billion by 2025. Similarly, the International Diabetes Federation predicts that the number of adults affected by diabetes will rise to 643 million by 2030 and 783 million by 2045. This growing prevalence underscores the need for effective IHD drugs to manage cardiovascular risks associated with these conditions.
