

# Vietnam Plasma Fractionation Market Updates 2024 : Market Dynamics, Key Strategies, Segments, and Competitive Scenario

The Vietnam plasma fractionation market is expected to reach \$79.03 million by 2027, registering a CAGR of 5.3% from 2020 to 2027.

WILMINGTON, DELAWARE , UNITED STATES, June 26, 2024

/EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "[Vietnam Plasma Fractionation Market](#) by Product, Application, and End User: Opportunity Analysis and Industry Forecast, 2020–2027."

The [Vietnam plasma fractionation](#) market was valued at \$56.62 million in 2019, and is expected to reach \$79.03 million by 2027, registering a CAGR of 5.3% from 2020 to 2027.

“

The Vietnam plasma fractionation market is segmented on the basis of product, application, and end user.”

*Allied Market Research*

The aging population and pre-existing medical issues among Vietnamese people as a result of the Second Indochina War are expected to fuel the market's expansion for Vietnam plasma fractionation. Furthermore, it is anticipated that the lack of alternatives to plasma fractionated products will propel market expansion in Vietnam, as these products are indestructible due to their histocompatibility, post-translational modifications, and lack of recombinant methods for protein replication. On

the other hand, stricter laws that require products to meet higher quality standards as well as integrated logistics for locating and gathering blood plasma and ensuring prompt delivery to clinics, hospitals, and pharmacies are expected to impede market expansion.
