

Why Invest in Sales Intelligence Market Share Reach USD 7.35 Billion by 2030

Rapid adoption of advanced solutions for improved customer targeting propels growth of the global sales intelligence market.

PORTLAND, PORTLAND, OR, UNITED STATE, June 26, 2024

/EINPresswire.com/ -- Allied Market Research published a new report, titled, " Why Invest in [Sales Intelligence Market Share](#) Reach USD 7.35 Billion by 2030." The report offers an extensive analysis of key growth strategies, drivers, opportunities, key segment, Porter's Five Forces analysis, and competitive landscape. This study is a helpful source of information for market players, investors, VPs, stakeholders, and new entrants to gain thorough understanding of the industry and determine steps to be taken to gain competitive advantage.

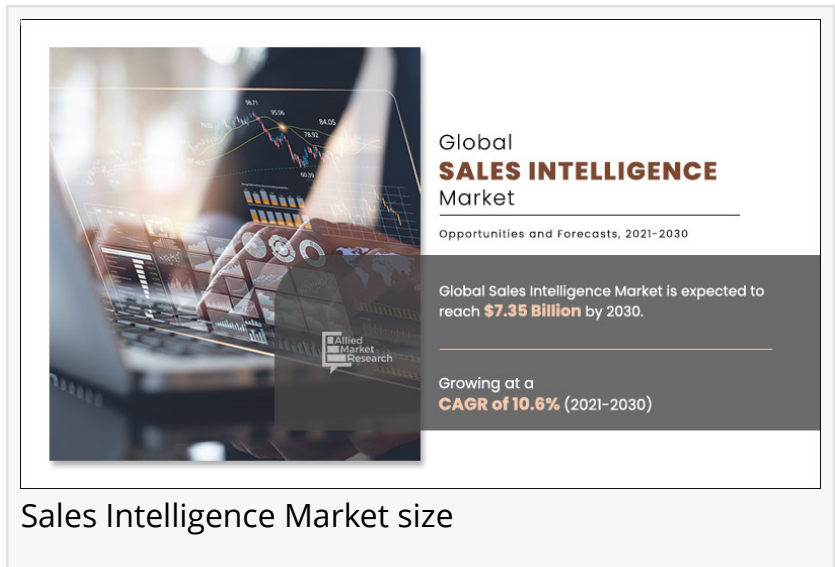

The global sales intelligence market size was valued at USD 2.78 billion in 2020, and is projected to reach USD 7.35 billion by 2030, growing at a CAGR of 10.6% from 2021 to 2030.

Increase in adoption of advanced solutions for improved customer targeting and demand for content optimization and data enrichment tools drive the growth of the global sales intelligence market. However, variations in industry-specific requirements restrain the market growth. On the other hand, incorporation of AI and ML capabilities to automate pre-sales processes create new opportunities in the coming years.

The global sales intelligence industry is segmented on the basis of component, deployment model, enterprise size, application, industry vertical, and region. By component, the market is bifurcated into software and services. By deployment model, it is categorized into on-premises and cloud. By enterprise size, it is divided into large enterprises and SMEs. By application, it is

segmented into analytics and reporting, data management, lead management, and others. By industry vertical, it is fragmented into BFSI, IT & telecom, retail & e-commerce, healthcare, media & entertainment, and others. Region wise, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Based on component, the software segment accounted for the largest share in 2020, contributing to more than two-thirds of the global sales intelligence market, and is expected to maintain its leadership status during the forecast period. This is due to ability offered to businesses to implement sales plans more effectively and faster than before. However, the services segment is expected to manifest the highest CAGR of 12.4% from 2021 to 2030, owing to ability offered to businesses to handle a large number of customers while maintaining a relatively small sales and support team.

Based on industry vertical, the IT & Telecom segment held the highest share in 2020, contributing to around one-fourth of the global sales intelligence market, and is expected to maintain its lead in terms of revenue during the forecast period. This is attributed to businesses being able to optimize their customer relationship management (CRM) portals to support sales executives in finalization of a sale by helping them determine solid leads much faster than before. However, the media & entertainment segment is estimated to portray the fastest CAGR of 12.8% from 2021 to 2030, owing to ability provided to effectively profile and target their customers to gain more viewership and widen the scope of their platforms.

Based on region, North America contributed to the largest share in 2020, accounting for nearly half of the global sales intelligence industry, and is projected to continue its dominant share by 2030. This is attributed to high adoption of sales intelligence solutions across end-user segments such as BFSI, retail, and healthcare and rise in investments in new technologies such as data analytics, big data, and machine learning. However, Asia-Pacific is projected to manifest the largest CAGR of 12.5% during the forecast period, owing to evolving consumer trends in the region and high population density leading businesses toward better sales conversion.

The key players profiled in the sales intelligence market analysis are Clearbit, Demandbase, Inc., Dun & Bradstreet Corporation, Data Axle, HG Insights, InsideView, LinkedIn Corporation, Oracle Corporation, ZoomInfo Technologies LLC, and Zoho Corporation.

Covid-19 Scenario

□ The Covid-19 pandemic impacted the sales intelligence market positively as there has been increase in investments by different companies in emerging technologies such as AI & machine learning and surge in need for sale intelligence software among enterprises to determine potential customers and tap on growth opportunities.

□ Sales intelligence software and services were widely adopted by small and medium-sized enterprises (SMEs) to take strategic decisions, address customer issues on a priority basis, and avail results in real-time.

Thanks for reading this article, you can also get an individual chapter-wise section or region-wise report versions like North America, Europe, or Asia.

If you have any special requirements, please let us know and we will offer you the report as per your requirements.

Lastly, this report provides market intelligence most comprehensively. The report structure has been kept such that it offers maximum business value. It provides critical insights into the market dynamics and will enable strategic decision-making for the existing market players as well as those willing to enter the market.
