Announcing the availability of Doc-Trak for CloudSuite Industrial (CSI)

Experience Document Automation now with Cloud Convenience

GREEN BAY, WISCONSIN, USA, June 27, 2024 /EINPresswire.com/ -- The Lake Companies, LLC, a leading provider of innovative document automation solutions, are thrilled to announce the availability of Doc-Trak in a multi-tenant cloud environment with CloudSuite Industrial. This significant update brings the power and efficiency of Doc-Trak to the cloud, offering businesses unparalleled convenience, scalability, and security.

Where Efficiency Meets Innovation - Experience the Future of Document Automation with Doc-Trak

> "We are excited to announce Doc-Trak for CloudSuite Industrial, providing our customers with the flexibility and convenience they need in today's fast-paced business environment."
>
> *Cheryl Valentine, Doc-Trak Product Manager*

Doc-Trak has been a trusted solution for organizations who are seeking to automate and streamline their document processes. By including a cloud environment option, Doc-Trak now provides users with a seamless, cloud-based experience, for CSI customers that want to eliminate the need for on-premises infrastructure while still allowing easy access to documents from anywhere, at any time.

With a seamless transition customers can easily lift and shift their on-premises Doc-Trak system to the cloud, ensuring a smooth and hassle-free migration. To further support customers, The Lake Companies is also actively working on moving Shop-Trak, their Manufacturing Execution Software, to CloudSuite Industrial. This added migration will enhance the comprehensive suite of products.

Key Benefits of Doc-Trak in the Cloud:
1. Customizable for Individual Needs: Each tenant can tailor Doc-Trak to meet their specific requirements while enjoying the advantages of a shared infrastructure.

2. Cost Efficiency: Shared infrastructure and resources result in lower operational costs compared to maintaining separate on-premises systems.

3. Continuous Innovation: Tenants benefit from regular updates and improvements ensuring access to the latest features and capabilities.

4. Reduced IT Burden: The cloud provider manages all backend IT tasks, including hardware maintenance, software updates, and security enhancements, easing the load on tenants' IT departments.

5. High Availability and Disaster Recovery: Multi-Tenant cloud environments are designed to ensure Doc-Trak remains accessible and reliable, even during infrastructure challenges.

6. Streamlined Documentation: Centralize control and security while efficiently managing production documentation across multiple sites.

7. Availability: Doc-Trak for CloudSuite Industrial is available July 1st.

A Word from the Doc-Trak Product Manager

"We are excited to announce Doc-Trak for CloudSuite Industrial, providing our customers with the flexibility and convenience they need in today's fast-paced business environment," said Cheryl Valentine, Doc-Trak Product Manager of The Lake Companies, LLC. "This launch represents our commitment to innovation and our dedication to helping businesses manage their documents more efficiently and securely."
