"Venture Capital Investment Market Expected to Reach \$1,068.5 Billion by 2031"

Allied Market Research

Market Research has published a report on the [venture capital investment market](#) in which it has touched upon various aspects of the industry ranging from growth forecast, upcoming trends, regional and segmental analysis, and competitive scenario of the landscape. The report provides actionable data and market intelligence on the changing dynamics of the sector in order to help businesses understand how the market might evolve in the

coming period. The study also presents accurate revenue numbers and CAGR values to substantiate the given information. The venture capital investment market size was valued at \$173.45 billion in 2021, and is estimated to reach \$1068.5 billion by 2031, growing at a CAGR of 20.1% from 2022 to 2031."

The primary aim behind the publication of the report is to provide companies with practical guidance on the investment opportunities and growth drivers of the industry so that they can focus their energies on the right areas. The study also covers the latest advancements and upcoming trends in the industry to enable businesses to stay well-informed about the recent developments in the landscape.

Furthermore, major market players are undertaking various strategies to increase the competition and offer enhanced services to their customers. For instance, Singapore-based Jungle Ventures raised \$600 million towards the close of its fourth fund. This includes \$450 million in the main fund and \$150 million in additional managed commitments. Therefore, with this latest fundraise, Jungle Ventures Assets Under Management (AUM) reached over \$1 billion. This makes Jungle the first independent Singapore-headquartered corporate venture capital

firms to achieve the feat. This is a major driving factor for the venture capital investment market.

The report segments the global venture capital investment market on the basis of funding type, fund size, industry vertical, and region. Based on funding type, the follow-on venture funding segment is expected to portray the highest CAGR of 24.4% during the forecast period. However, the first-time venture funding segment held the largest share in 2021, contributing to around three-fourths of the market.

On the basis of fund size, the above \$1 billion segment is projected to showcase the highest CAGR of 23.8% during the forecast period. However, the under \$50 million segment held the lion's share in 2021, accounting for more than one-fourth of the market.

Based on industry vertical, the computer and consumer [electronics segment held the largest share](#) in 2021, accounting for more than one-fourth of the market. However, the energy segment is projected to register the highest CAGR of 22.7% during the forecast period.

The global venture capital investment market is analyzed across several regions such as North America, Europe, Asia-Pacific, and LAMEA. The market across North America dominated in 2021, holding nearly two-fourths of the market. However, the market across Asia-Pacific is projected to showcase the highest CAGR of 22.9% during the forecast period.
