

# Thoracic Surgery Devices Market Poised for Growth, Expected to Reach \$12.3 Billion by 2028

*The Business Research Company's Thoracic Surgery Devices Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033*

LONDON, GREATER LONDON, UK, June 27, 2024 /EINPresswire.com/ -- The thoracic surgery devices market is projected to grow from \$8.07 billion in 2023 to \$8.89 billion in 2024, at a CAGR

of 10.1%. This growth is attributed to advancements in surgical techniques, an aging population, increasing prevalence of thoracic diseases, rising surgical volumes, and healthcare infrastructure development. The market is expected to continue its strong growth trajectory, reaching \$12.3 billion by 2028, with a CAGR of 8.5%. Factors driving this growth include the integration of

robotics and AI, patient-centric approaches, customized implant solutions, telemedicine, and the adoption of value-based healthcare models.

Rising Prevalence of Thoracic Diseases Drives Market Growth

The rising prevalence of thoracic diseases, affecting organs within the chest cavity such as the heart, lungs, and major

blood vessels, is a significant driver for the thoracic surgery devices market. Conditions like chronic obstructive pulmonary disease (COPD) are contributing to increased surgical interventions and the demand for advanced surgical devices.

Major Players and Technological Innovations

Key players in the thoracic surgery devices market, including Cardinal Health, Medtronic PLC, and Intuitive Surgical, are focusing on innovative products. For instance, the development of 3D-

printed bioresorbable airway stents represents a significant technological advancement, providing customized support tailored to patients' specific anatomy. In a notable development, ETH Zurich introduced 3D-printed bioresorbable airway stents designed to dissolve gradually after implantation, eliminating the need for invasive removal procedures.

#### Market Segmentation

- Product Types: Forceps, Graspers, Clamps And Staplers, Scissors, Spreaders, Needle Holders, Other Products
- Surgery Types: Lobectomy, Wedge Resection, Pneumonectomy, Other Surgery Types
- End-Users: Hospitals, Ambulatory Surgical Centers, Other End-Users

#### Geographical Insights: North America Leading the Market

North America dominated the thoracic surgery devices market in 2023 and is expected to maintain its leading position throughout the forecast period. The region benefits from advanced healthcare infrastructure and high adoption rates of innovative medical technologies.
