Static Analysis Market Size, Share, Revenue, Trends And Drivers For 2024-2033

The Business Research Company's Static Analysis Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

LONDON, GREATER LONDON, UK, June 27, 2024 /EINPresswire.com/ -- The global static analysis market is projected to grow from $1.35 billion in 2023 to $1.59 billion in 2024, at a CAGR

The Business Research Company

Static Analysis Global Market Report 2024 : Market Size, Trends, And Global Forecast 2024-2033

of 17.4%. The growth in the historic period can be attributed to increasing software complexity, stringent regulatory standards, shift left in software development, integration with development environments, and proliferation of open-source software. The market is expected to see rapid growth in the next few years, reaching $2.99 billion in 2028 at a compound annual growth rate

(CAGR) of 17.1%. This growth is driven by the adoption of DevOps practices, increased emphasis on software security, rapid growth in IoT development, AI and machine learning integration, compliance with privacy regulations, and shift to microservices architecture.

Rising Number of Cyber Threats Propelling Market Growth

The rising number of cyber threats is a significant driver for the static analysis market. Cyber threats pose risks to computer systems, networks, data, and digital infrastructure. Static analysis plays a crucial role in identifying vulnerabilities in source code before software deployment, thus mitigating potential cyber attacks. For instance, according to the Australian Cyber Security Center, cybercrime reports increased by 13% in 2022, highlighting the growing importance of cybersecurity measures like static analysis.
