

Patient Lateral Transfer Market Poised for Growth, Expected to Reach \$6.43 Billion by 2028

The Business Research Company's Patient Lateral Transfer Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

LANDON, GREATER LANDON, UK, June 27, 2024 /EINPresswire.com/ -- The [patient lateral transfer market](#) has seen robust growth in recent years, driven by the increasing emphasis on

healthcare worker safety and the rising aging population. According to recent market analysis, the market size is projected to grow from \$4.09 billion in 2023 to \$4.49 billion in 2024, achieving a compound annual growth rate (CAGR) of 9.8% during this period. This growth trajectory is underpinned by several factors, including the escalating healthcare expenditure, prevalence of chronic diseases, and the healthcare industry's focus on reducing hospital-acquired infections.

Rising Demand for Bariatric Transfer Solutions Drives Market Growth

The forecast period anticipates even stronger growth, with the patient lateral transfer market expected to expand to \$6.43 billion by 2028, growing at a CAGR of 9.4%. This

growth will be fueled by increasing demands for specialized solutions such as bariatric transfer aids, alongside the global aging population's continued expansion and the proliferation of ambulatory care services. Collaboration for product innovation among industry players is also set to play a crucial role in shaping market dynamics.
