Physical Therapy Global Market Report
2024 – Market Size, Trends, And Global
Forecast 2024-2033*

LONDON, GREATER LONDON, UK, June 27, 2024 /EINPresswire.com/ -- The global physical therapy market has shown robust growth in recent years, with expectations to continue its

upward trajectory. Starting from \$25.95 billion in 2023, the market is projected to reach \$27.89 billion in 2024, growing at a compound annual growth rate (CAGR) of 7.5%. This growth can be attributed to several factors, including an aging population, increasing prevalence of chronic conditions, rising occurrences of occupational and sports injuries, and a heightened focus on preventive healthcare measures.

**Rising Incidence of Musculoskeletal Disorders Drives
Market Growth**

A significant driver of the physical therapy market is the increasing prevalence of musculoskeletal disorders (MSDs) globally. These disorders affect millions worldwide and necessitate specialized physical therapy interventions for prevention, treatment, and management. With approximately 1.71 billion people reported to have

musculoskeletal conditions globally, the demand for physical therapy services is expected to rise significantly.
