The healthcare virtual assistants market is anticipated to see robust growth, reaching \$6.2 billion by 2028, at a CAGR of 41.4%. Factors contributing to this growth include the prevalence of chronic diseases, rising teleconsultation demand, enhanced patient engagement efforts, and the increasing burden of lifestyle diseases.

Technological Advancements and Telehealth Services
Technological advancements, product innovations, partnerships, and investments in healthcare are key trends

expected to shape the market. Increasing telehealth services are driving the adoption of healthcare virtual assistants, enabling automated, 24/7 patient support for tasks like appointment scheduling, symptom checking, medication reminders, and personalized health advice.
