[Institute](#) is proud to announce

significant enhancements to [Expert](#)

[Radar](#), its pioneering AI-powered

solution designed to transform the way

legal professionals conduct expert witness due diligence. These latest advancements redefine efficiency in legal research, setting a new standard in the industry.

AI-driven due diligence on expert witnesses

Traditional methods of researching expert witnesses are often limited in scope and ineffective, requiring a myriad of paid subscriptions and extensive time commitments. Expert Radar addresses these challenges head-on by leveraging AI to streamline the entire research process.

“

With faster delivery, expanded coverage, and ongoing product enhancements, our holistic approach to expert witness due diligence ensures clients can make informed decisions quickly and accurately.”

Michael Talve, CEO

Key enhancements to Expert Radar:

- Expanded coverage: Data is sourced from an even wider-array of top legal and professional databases.
- Faster delivery: Advanced AI algorithms provide critical insights more quickly than ever before.
- Precise searches: AI systems analyze thousands of searches to produce highly precise results.

- AI automation: Enhances data collection from both proprietary and public sources for a thorough research process.

- Ongoing monitoring: 24/7 surveillance and real-time updates on newly surfaced data.

Radar's innovative technology casts a wide net across key legal databases, gathering vast amounts of data and employing advanced parsing techniques and relevance scoring. This process ensures that the information provided is both precise and highly relevant—essential for accurately assessing experts, particularly those with common names.

"With faster delivery, expanded coverage, and ongoing product enhancements, our holistic approach to expert witness due diligence ensures clients can make informed decisions quickly, enhancing their ability to succeed in complex legal cases," says Michael Talve, CEO.

Experience the Future of Legal Research:

Expert Radar is now equipped to handle millions of unstructured legal documents, turning a daunting task into a streamlined process. With its interactive and searchable profiles, legal professionals can access detailed information about any expert witness at any time.
