### Pooled Ethereum Staking: An Inclusive Approach

The new pooled staking service allows users to combine their Ethereum assets with others to meet the staking requirements collectively. This innovative approach lowers the barrier to entry, making it easier for more people to participate in Ethereum staking and earn rewards.

"Ethereum staking typically requires a minimum of 32 ETH, which can be a substantial amount for individual investors. Our pooled staking service removes this barrier, enabling users to stake smaller amounts and still benefit from the rewards," explained Warwick.
