

New Mid-year Edition Added to Annual Product Safety & Recall Directory®

Section focuses on 2024 product safety trends, including: Artificial Intelligence, compliance, counterfeit products, and working beyond 65

ST. LOUIS, MISSOURI, USA, July 8, 2024

/EINPresswire.com/ -- ADK Information Services, LLC has added a new publication to its library of product safety literature. The edition focuses on 2024 trends in the product safety field. Its content includes: the increase in professionals who work beyond age 65; foreseeable use and misuse of Generative AI in product safety; more enforcement and compliance plans in the future.

Other trends discussed in the directory address product recalls; sustainability; specific attention on visible products drawn to table saws and button and coin batteries; counterfeit products; education trends in the area of professional career development; and organizational culture and ethics.

New ADK title serving product safety field

The mid-year edition, available at no cost, can be found on the home page of ADK's website. In addition to the ADK Product Safety & Recall Directory®, ADK publishes the semi-weekly Product Safety Education newsletter, and the weekly Product Safety Network News™. The mid-year edition editor is Harold Zinn.
