Major Players and Market Trends

Key players in the construction management software market include Oracle Corporation, SAP SE, Kiewit Corporation, Hilti Corporation, Roper Technologies Inc., Trimble Inc., Autodesk Construction Cloud (ACC), Nemetschek SE, Procore Technologies Inc., Hyland Software Inc., Odoo SA, Viewpoint, Constellation Homebuilder Systems, CMiC, Aconex, Chetu Inc., Systemates Inc., Buildertrend Solutions Inc., Prolog, Bluebeam Revu, Computer Methods International Corp., Jonas Enterprise Construction Software, Penta Technologies Inc., Cosential, Constructware. Major companies operating in the construction management software market are focusing on the integration of advanced technologies, such as building information modeling (BIM), to gain a competitive advantage. Building information modeling (BIM) software in construction refers to digital tools for creating, managing, and collaborating on 3D models that incorporate building information throughout the project lifecycle.

Segments:

- 1) By Component: Solution, Services
- 2) By Deployment Mode: On-Premise, Cloud
- 3) By Building Type: Commercial Buildings, Residential Buildings
- 4) By Application: Project Management And Scheduling, Safety And Reporting, Project Design, Field Service Management, Cost Accounting, Other Applications
- 5) By End-User: Architects And Designers, Construction Managers, Other End Users

Geographical Insights: North America Leading the Market

North America was the largest region in the construction management software market in 2023. Asia-Pacific is expected to be the fastest-growing region during the forecast period, driven by expanding healthcare facilities and increasing awareness of the benefits of construction management software.

Construction Management Software Market Definition

Construction management software is a type of project management software designed to streamline and enhance the management and execution of construction projects. It is used to provide a centralized platform for project managers, contractors, architects, engineers, and other stakeholders to collaborate, plan, monitor, and control various aspects of a construction project.

Construction Management Software Global Market Report 2024 from TBRC covers the following

information:

- Market size data for the forecast period: Historical and Future
- Market analysis by region: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.
- Market analysis by countries: Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, UK, USA.

Trends, opportunities, strategies and so much more.

The Construction Management Software Global Market Report 2024 by The Business Research Company is the most comprehensive report that provides insights on construction management software market size, construction management software market drivers and trends, construction management software market major players, competitors' revenues, market positioning, and market growth across geographies. The construction management software market report helps you gain in-depth insights on opportunities and strategies. Companies can leverage the data in the report and tap into segments with the highest growth potential.
