By component, the solution segment held the major share in 2022, garnering nearly one-third of the global video on demand market revenue, owing to various technologies, platforms, and strategies that enable the delivery of video content to users on-demand, allowing them to watch videos whenever they want. In addition, these solutions provide tools and systems for organizing, storing, and managing video content. However, the service segment would also showcase the fastest CAGR of 18.9% during the forecast period, owing to offer a wide variety of content, ranging from movies and TV shows to documentaries, original series, and user-generated content. In addition, video on demand services provide a means for content creators to distribute their videos directly to their target audience.

By monetization models, the subscription-based segment held the major share in 2022, garnering nearly two-thirds of the global video on demand market revenue, owing to services accessible on multiple devices, offering personalized features, and often has user-friendly interfaces to improve user experience, and make data-driven decisions regarding content creation. However, the advertising-based segment is projected to showcase the fastest CAGR of 19.4% during the forecast period, owing to provide customized advertisements by utilizing data analytics and insights into user behavior, which improves the efficiency of marketing efforts.
