The Business Research Company's Short Biorational Pesticides Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

LONDON, GREATER LONDON, UK, July 2, 2024 /EINPresswire.com/ -- The global biorational pesticides market has seen rapid growth in recent years, driven by increasing demand for

organic agriculture and stringent regulations on chemical pesticides. The market is projected to grow from \$5.91 billion in 2023 to \$6.75 billion in 2024, at a compound annual growth rate (CAGR) of 14.3%. It will grow to \$10.96 billion in 2028 at a compound annual growth rate (CAGR) of 12.9%. This growth is attributed to factors such as consumer preference for environmentally

"

The biorational pesticides market size is expected to see rapid growth in the next few years. It will grow to \$10.96 billion in 2028 at a compound annual growth rate (CAGR) of 12.9%." The Business Research Company friendly pest control solutions and the need for effective resistance management in pest control.

Rising Demand for Residue-Free Organic Crops Drives Market Growth

The increasing demand for residue-free organic crops is a significant driver for the <u>biorational pesticides market</u>. Organic farming practices, which exclude synthetic pesticides, herbicides, and fungicides, rely on biorational pesticides to control pests effectively while maintaining soil health. According to the U.S. Department of Agriculture, organic sales reached \$11.2 billion in 2021, indicating a

growing market for organic produce and supporting the demand for biorational pesticides.
