“

The growth of the global secure logistics market is driven by increase in the demand for outsourcing branch and ATM service and increase in the demand for product integrity

”

Allied Market Research

These standards are developed in the context of regulated entities' (REs) existing practice of heavily leveraging IT and IT-enabled services (ITES) to facilitate the company's structure as well as the products and services provided to clients. Outsourcing of branch services such as cash management and ATM services in which many firms offer ATM monitoring solutions with SLA management, increases the demand for the secure logistics market share.

Secure logistics market is expected to reach \$191.9 Billion in 2032, growing at a CAGR of 8.4% (2023-2032)

Prime determinants of growth

Increase in the demand for outsourcing branch and ATM service and increase in the demand for product integrity drive the growth of the global secure logistics market. However, increase in the usage of electronic payment and high cost involved in services, restricts the market growth. Moreover, securing last mile delivery across developed and developing economies presents new opportunities in the coming years.

Based on type, the static segment held the largest market share in 2022, accounting for nearly two-thirds of the global [secure logistics market revenue](#). However, mobile is projected to manifest the highest CAGR of 9.8% from 2023 to 2032, owing to secure mobility offered by the segment. The normal vehicles are not utilized, instead armored vehicles with advanced security systems are used for transportation. Similarly, air cargo services are also offered in the mobile logistics solutions where the precious cargo is shipped with the help of an aircraft. The goods are transported to the longer distances in less time and movement to international locations is also viable.

Regional Outlook:

Based on region, North America held the largest market share in terms of revenue in 2022. However, Asia-Pacific is projected to manifest the highest CAGR of 10.5% from 2023 to 2032, owing to heavy investment on the rail network or freight corridor for the movement of goods and packages in the Asia-Pacific region. For instance, in June 2022 the Indian government invested \$245 million to improve the railways infrastructure. Similarly, China is also developing rail network across middle-east and to the Europe, and signed a trilateral memorandum of

understanding between Kazakhstan's authorized economic operators, China, and the EU. These developments are expected to drive the growth of secure logistics market in the Asia-Pacific region.

Based on mode of transport, the roadways segment accounted for the largest share in 2022, contributing to nearly half of the global secure logistics market revenue. However, railways are projected to manifest the highest CAGR of 9.4% from 2023 to 2032, owing to dedicated and controlled tracks of the railways that can be easily tracked with the integration of GPS tracking and monitoring system. The bulk movement of the cargo or package reduces the overall cost of movement and in many cases can be more cost effective than the road transport of the package. Such capability of the railways is expected to boost the growth of the market.
