Based on component type, the solution segment held the largest market share in 2022 accounting for more than two-thirds of share of the global cloud data security market revenue and is estimated to maintain its leadership status throughout the forecast period. This is attributed to the increase in amount of innovative cloud solutions developed every year by different software and cloud development companies and start-ups all over the world. In addition the transition of businesses to cloud environment is driving the segment growth. However the service segment is expected to grow during the forecast period with a CAGR of 20.2% from 2022 to 2032. This is attributed to the surge in adoption of cloud technologies for digital transformation.

Based on enterprise size, the large enterprise segment held the largest market share in 2022 accounting for two-thirds of share of the global cloud data security market revenue and is estimated to maintain its leadership status throughout the forecast period. This is attributed to the availability of finance to buy cloud infrastructure to support their operations and the need for cloud protection as large amount of valuable company data is present in the cloud. However, the small and medium sized enterprise is expected grow during the forecast period at a CAGR of 20.3% from 2022 to 2032. This is attributed to the gradual increase in transition of small and medium sized companies to cloud environment to take advantage of cloud technology.
