

# GigaOm's Radar Report for Enterprise Password Management Names Keeper Security a Leader for Third Consecutive Year

*Keeper® is praised for strengths in secrets management, IdP integration and compliance.*

LONDON, UNITED KINGDOM, July 3, 2024

/EINPresswire.com/ -- [Keeper Security](#), the leading provider of zero-trust and zero-knowledge cybersecurity software protecting passwords and passkeys, privileged access, secrets and remote connections, is once again recognized as a Leader in the [GigaOm Radar Report for Enterprise Password Management](#),

earning the highest marks of any vendor for overall value. This marks the third consecutive year Keeper has earned this prestigious accolade, and highest ranking on the report, underscoring its commitment to providing cutting-edge cybersecurity solutions.

“

At Keeper, we're not just safeguarding credentials and sensitive data – we're empowering organisations with robust solutions that redefine the industry.”

*Craig Lurey, CTO and Co-founder, Keeper Security*

The GigaOm report evaluates 13 leading password management solutions, focusing on key features, business criteria and emerging technologies. Keeper scores high across all of the decision criteria, and distinguishes itself with its relentless pursuit of innovation and growth, particularly through its zero-trust Privileged Access Management (PAM) solution, [KeeperPAM](#). Additionally, the report highlights Keeper's secrets management, seamless integration with Identity Providers (IdP) and strong compliance features as significant competitive advantages.

"Securing a place as a Leader in GigaOm's Radar Report for the third consecutive year underscores Keeper's commitment to pioneering solutions that address today's real-world cybersecurity challenges," said Craig Lurey, CTO and Co-founder, Keeper Security. "At Keeper, we're not just safeguarding credentials and sensitive data – we're empowering organisations with robust solutions that redefine the industry. This accolade reaffirms our dedication to innovation and reinforces our promise to deliver unparalleled protection against evolving cyber

threats."

Keeper's placement as an Outperformer in the Innovation/Platform Play quadrant emphasises its extensive features and dedication to providing top-tier cybersecurity technology. The GigaOm Radar plots vendor solutions across a series of concentric rings with those set closer to the centre judged to be of higher overall value. Keeper Security outperforms all other solutions on the Radar, placed close to the centre, deeming its solution as having the highest overall value. As password security remains essential to protecting digital assets, Keeper's user-friendly and cost-effective solutions offer exceptional protection for any sized organisation, from small businesses to large enterprises.

Key features highlighted by GigaOm include:

- KeeperPAM: Integrates password, secrets and connection management into a single, interconnected solution
- Centralised Password Vault: Seamlessly integrates with a variety of Identity Providers (IdP), reducing adoption overhead
- BreachWatch® Dark Web Monitoring: Real-time notification of any corporate identity breach, helping operations teams quickly take action and reduce risk
- Comprehensive Policy Granularity: Enables administrators to separate task and password access into individual organisation units, including limiting or blocking password sharing
- Secrets Management: Comprehensive capability for managing infrastructure secrets such as API keys, database passwords, access keys and certificates. It integrates with DevOps and CI/CD platforms to support the full key management lifecycle.
- Compliance: The most secure, certified, tested and audited password security platform that is FedRAMP authorised and maintains the longest-standing SOC2 compliance and ISO27001 certification in the industry.

These standout features further affirm Keeper's status as a premier solution in enterprise password management. Its zero-trust and zero-knowledge architecture, combined with advanced tools like secrets management, passkey generation and storage, and end-to-end encryption, establish Keeper as a formidable defence against today's sophisticated cyber threats.

GigaOm's report also commends Keeper for its scalability and flexibility, essential attributes in today's dynamic cybersecurity landscape. Keeper's latest innovations, such as Time-Limited Access and Self-Destructing Records which support more granular sharing controls, demonstrate its forward-thinking approach and dedication to meeting evolving cybersecurity needs.

###

About Keeper Security

Keeper Security is transforming cybersecurity for people and organisations around the world. Keeper's affordable and easy-to-use solutions are built on a foundation of end-to-end

encryption, zero-trust and zero-knowledge security to protect every user on every device. Our next-generation privileged access management solution deploys in minutes and seamlessly integrates with any tech stack to prevent breaches, reduce help desk costs and ensure compliance. Trusted by millions of individuals and thousands of organisations, Keeper is the leader for best-in-class password and passkey management, secrets management, privileged access, secure remote access and encrypted messaging.
