

Kidney Disease Market Segments, Driver, Restraints, And Trends

The Business Research Company's Kidney Disease Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

LONDON, GREATER LONDON, UK, July 4, 2024 /EINPresswire.com/ -- The kidney disease market has witnessed robust growth in recent years, with its size expanding from \$99.22 billion in

2023 to \$106.6 billion in 2024, marking a compound annual growth rate (CAGR) of 7.4%. This growth can be attributed to several factors such as rising chronic health conditions, an aging population, genetic predisposition, advancements in medical research and education, and environmental factors.

Drivers

The market is expected to continue its strong growth trajectory, reaching \$136.97 billion by 2028, with a CAGR of 6.5%. Key drivers for this growth include global infectious disease management, precision medicine approaches, the diabetes and obesity epidemic, healthcare policy changes, increased awareness, and enhanced screening efforts.

The increasing prevalence of high blood pressure and diabetes plays a pivotal role in driving the kidney disease market forward. High blood pressure strains kidney blood vessels, impairing their filtration function, while diabetes can cause inflammation and vessel damage, exacerbating kidney conditions.

For instance, in 2023, the Centers for Disease Control and Prevention reported that 38.4 million people in the United States, constituting 11.6% of the population, had diabetes, underscoring its significant impact on kidney health.
