

# Warts Therapeutics Market Set to Expand, Projected to Reach \$2.29 Billion by 2028

*The Business Research Company's Warts Therapeutics Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033*

LONDON, GREATER LONDON, UK, July 4, 2024 /EINPresswire.com/ -- The [global warts therapeutics market](#), which addresses medical treatments

for the skin condition caused by the

human papillomavirus (HPV), has shown steady growth in recent years. Starting from \$1.91 billion in 2023, the market is anticipated to grow to \$1.98 billion in 2024, reflecting a compound annual growth rate (CAGR) of 4.0%. This growth can be attributed to advancements such as salicylic acid treatments, cryotherapy developments, evolving topical treatments, surgical interventions, and the rise of immunotherapy.

The warts therapeutics market size is expected to see steady growth in the next few years. It will grow to \$2.29 billion in 2028 at a compound annual growth rate (CAGR) of 3.7%.”

*The Business Research Company*

## Driving Factors

The market's expansion in the forecast period, reaching an estimated \$2.29 billion by 2028 with a CAGR of 3.7%, is fueled by innovations in precision medicine targeting HPV, advancements in laser therapies, combination therapies, digital health solutions, and initiatives enhancing healthcare accessibility. Major trends include the development of targeted antiviral therapies, ongoing research in gene editing, biodegradable delivery systems, the emergence of psychodermatology, and the advent of

telemedicine.
