

Amplifying Digital Presence in the Construction Industry - July 4, 2024

Peer-to-peer digital content sharing for construction and building professionals

SUNDRE, ALBERTA, CANADA, July 4, 2024 /EINPresswire.com/ -- Since its establishment in 2003, Construction Links Network has emerged as a premier news and information hub in the construction sector. With a commitment to enhancing the digital presence and search engine visibility of its members, Construction Links Network has become an indispensable resource for a wide array of professionals. This includes construction managers, contractors, developers, building and property managers, architects, designers, engineers, and government officials.

As a dynamic hub for digital content dissemination, Construction Links Network offers its members diverse engagement opportunities through news releases, company announcements, blogs, podcasts, webinars, case studies, whitepapers, and videos.

In celebration of Canada Day on July 1 and Independence Day on July 4, our featured video highlights the recent connecting of the Gordie Howe International Bridge. Construction of the bridge deck began in December 2022, and last month crews installed the final segment, the mid-span closure. This custom-built segment filled an 11-meter gap and took multiple steps to install, including alignment adjustments and structural surveys. The bridge deck, built one segment at a time, involved pre-designed segments made of steel and concrete. The final connection marks a significant milestone, although further work is required to complete the bridge, such as re-stressing cables, installing electrical systems, and paving.

This week's featured content includes a range of topical subjects:
