

# Global Malaria Treatment Market Poised for Growth, Expected to Reach \$1.94 Billion by 2028

*The Business Research Company's  
Malaria Treatment Global Market Report  
2024 – Market Size, Trends, And Global  
Forecast 2024-2033*

LONDON, GREATER LONDON, UK, July 5, 2024 /EINPresswire.com/ -- The global malaria treatment market has

shown robust growth in recent years, with revenues expected to increase from \$1.49 billion in 2023 to \$1.57 billion in 2024, reflecting a compound annual growth rate (CAGR) of 5.1%. It will grow to \$1.94 billion in 2028 at a compound annual growth rate (CAGR) of 5.5%. This growth can be attributed to advancements in effective drugs, vector control efforts, global health initiatives, scientific research, and health infrastructure development.

Rising Incidence and Healthcare Initiatives Drive Market Growth

The high incidence of malaria, a life-threatening mosquito-borne disease caused by the Plasmodium parasite, is a significant driver for the market. Factors such as poverty, limited healthcare access, climate change, inadequate malaria control measures, and drug resistance contribute

to its prevalence. Malaria treatment plays a crucial role in managing and curing infections, addressing symptoms like recurring fever and flu-like symptoms.

Explore the global malaria treatment market with a detailed sample report:
