Definition

The artillery systems market refers to the global industry involved in the design, development, manufacturing, distribution, and maintenance of various types of artillery weapons and systems used by military forces around the world. Artillery systems encompass a wide range of weapons, including cannons, howitzers, mortars, rocket launchers, and missile systems, which are primarily utilized for indirect fire support, long-range precision strikes, and area denial. These systems play a crucial role in modern warfare by providing firepower, suppressing enemy positions, and supporting ground operations.

On 18th July 2023, Elbit Systems Ltd. received a \$150 million contract to provide PULS™ rocket launchers and precision-guided long-range rockets. On 10th July 2023, BAE Systems Bofors AB has secured a £4 million contract from the UK Ministry of Defence to support the Archer Artillery System, which includes technical design, configuration, training, maintenance, repair, and configuration management services.
