Rising Incidence of Heart-Related Conditions Drives Market Growth

The rising incidence of heart-related conditions is a significant factor contributing to the growth of the mobile ECG devices market. Mobile ECG devices are primarily used to diagnose myocardial infarction and cardiac arrhythmias, enabling more effective and manageable monitoring of

heart disorders. For instance, the British Heart Foundation reported 34,518 stroke deaths in the UK in 2020, up from 34,420 in 2019. This rising incidence underscores the need for effective monitoring solutions like mobile ECG devices.

Key Players and Market Trends

Major companies operating in the mobile ECG devices market include Medtronic PLC, Koninklijke Philips N.V., GE Healthcare, Omron Corporation, and Mindray Medical International Limited. These companies are focusing on strategic partnerships to develop advanced ECG technology.

For example, Bittium Corporation and Technomed Limited signed an agreement in September 2021 to strengthen their partnership in ECG technology development, highlighting the trend of strategic collaborations.

Segments:

- Type: Monitoring ECG Systems, Diagnostics ECG Systems
- Modality: Handheld, Pen, Band, Other Modalities
- End User: Personal Users, Hospitals, Clinics, Ambulatory Services

Geographical Insights: North America Leading the Market

North America was the largest region in the mobile ECG devices market in 2023. However, Asia-Pacific is expected to be the fastest-growing region during the forecast period, driven by increasing healthcare awareness and expanding telehealth services.
