The surge in the prevalence of myasthenia gravis is a significant factor contributing to the growth of the myasthenia gravis treatment market. Myasthenia gravis is an autoimmune neuromuscular disease causing fatigue and weakness in the skeletal muscles. The increased prevalence of this condition boosts the demand for effective treatments. According to the National Organization for Rare Disorders, the prevalence of

autoimmune myasthenia gravis in the US is estimated to be 14–40 per 100,000 individuals. Similarly, a study by Kermanshah University of Medical Sciences and University Putra Malaysia estimated the global prevalence at 12.4 people per 100,000.
