Data Analysis -The Rise of Healthcare Giants:

Recent data from the Fortune 500 list reveals staggering growth in revenues for top healthcare

companies since the ACA was implemented. For instance, UnitedHealth Group's revenue surged from \$110.6 billion in 2013 to \$371.62 billion in 2023. Similarly, CVS Health, after acquiring Aetna, saw their revenue jump from \$2.1 billion (Aetna pre-ACA) to over \$357 billion, earning them the 6th spot on the Fortune 500 list.

This dramatic increase is not an isolated case. Overall, the combined revenue of top insurance companies ballooned from \$269.0 billion in 2013 to \$1.39 trillion in 2023. This five-fold growth is the result of how the ACA has inadvertently funneled vast sums of money into the coffers of these industry giants, often at the expense of consumers who face rising premiums, high deductibles, out-of-pocket costs, and even bankruptcy to medical bills even though they have health insurance.
