

Phytosterols Market Size, Share, Revenue, Trends And Drivers For 2024-2033

The Business Research Company has updated its global market reports with latest data for 2024 and projections up to 2033

LONDON, GREATER LONDON, UK, July 9, 2024 /EINPresswire.com/ -- The [phytosterols market](#), which refers to bioactive substances naturally

occurring in plants with a structure

akin to cholesterol, has experienced rapid growth in recent years. Starting at \$1 billion in 2023, it is projected to reach \$1.11 billion in 2024, growing at a compound annual growth rate (CAGR) of 10.8%. It will grow to \$1.67 billion in 2028 at a compound annual growth rate (CAGR) of 10.7%.

This growth can be attributed to increasing awareness of health benefits, the rising prevalence of cardiovascular diseases, trends in functional food and nutraceuticals, government initiatives combatting obesity, and the adoption of functional ingredients in cosmetics.

Rising Prevalence of Cardiovascular Diseases Drives Market Growth

The increasing prevalence of cardiovascular diseases worldwide, encompassing conditions affecting the heart or

blood vessels, is a significant driver for the phytosterols market. These conditions include coronary heart disease, stroke, peripheral arterial disease, aortic disease, and others.

Phytosterols compete with dietary cholesterol for absorption in the intestines, thereby lowering blood cholesterol levels and reducing the risk of heart disease, heart attacks, and strokes.

Studies indicate that daily consumption of phytosterols can reduce LDL cholesterol levels by 8% to 10%.
