Patriots Coin, a very successful WEB2 business, had eyes set on the blockchain for several years and partnering with PREME, swiftly brought that to fruition. Patriots Coin specializes in creating fractionalized and branded gold and silver for their clients. Another utility setting Patriots Coin apart is their [game](#) studio. PREME Token's WEB3 concept quickly spurs business growth with an initial raise of liquidity on Pinksale Finance. In this case, with Patriots Coin, we raised an outstanding...

40 ETH (140K dollars) in one week.

PREME develops and launches smart contracts for their partners, like Patriots Coin, that greatly benefit PREME holders too, by incorporating at the minimum, a 1% TVL buy and burn of PREME Token. This function allows for instant liquidity in the PREME chart.

PREME Token offers a myriad of successful solutions for businesses looking to transition to WEB3, including tokenization, NFT crowd funding, marketing, consulting, and dAPPs.

The future is bright for both projects with PTC currently setting at .034 -- up 100% since launch and PREME TOKEN having 7 Buys and Burns in the first 48 hours. PREME Token plans to launch 5-20 more projects before the end of this year, so PREME's value and liquidity should be growing daily.
