Covid-19 Scenario:

The outbreak of the COVID-19 pandemic led to the rise in awareness among individuals of maintaining proper fitness, resulting in the opening of new pilates studios and fitness centers. This influenced the sales of equipment in the residential sector as consumers were eager to

perform exercises at their homes to improve their fitness. This boosted the growth of the pilates equipment and gears market.

The report offers a detailed segmentation of the global pilates equipment and gears market based on type, application, distribution channel, and region. The report provides an analysis of each segment and sub-segment with the help of tables and figures. This analysis helps market players, investors, and new entrants in determining the sub-segments to be tapped on to achieve growth in the coming years.

Based on type, the pilates reformers segment held the largest share in 2015, accounting for nearly one-fourth of the global pilates equipment and gears market, and would maintain its dominance during the forecast period. However, the others segment is estimated to witness the fastest CAGR of 14.7% during the forecast period.

Based on application, the commercial space segment held the largest share in 2015, accounting for nearly three-fifths of the global pilates equipment and gears market and would lead the market in terms of revenue during the forecast period. However, the residential space segment would witness the fastest CAGR of 11.5% during the forecast period.
