□□□□□-□□ □□□□□□□□:

The impact of COVID-19 pandemic is expected to remain moderate for the Europe assistive technology for students with learning disabilities market. As nationwide lockdown, government regulations in response to the COVID-19 pandemic, and continuous increase in infection rate across numerous countries have created a widespread financial impact on the assistive technology industry. The Europe assistive technology for students with learning disabilities market and entire healthcare field have witnessed strong impact due to the outbreak of COVID-19, forcing hospitals, clinics, and primary care doctors to alter the ways they conduct business.

According to a recently released Public Health England survey, individuals with learning disabilities are more likely to be exposed to COVID-19 infection. These people are at high risk of losing their lives due to the COVID-19 infection, due to lack of care provided to individuals with disabilities. This has created incremental benefits for businesses in the market for learning disability treatment, where organizations can minimize mortality rates by encouraging routine patient testing. To minimize exposure to COVID-19, routine staff testing and proper sanitization of their personal protective equipment (PPE) are important.
