

WorldVuer Presents Techwrist

A wearable visual communicator with a revolutionary Ai biodata stack designed to transition smart watches into a user-friendly lifestyle protector.

LOS ANGELES , CALIFORNIA , UNITED STATES OF AMERICA, July 15, 2024 /EINPresswire.com/ -- Worldvuer introduced its innovative Ai powered Techwrist wearable [life Optimizer](#), a breakthrough advancement in smart watch technology that provides multiple lifestyle transformational applications to the companies customers.

The WorldVuer Techwrist provides wearable device enthusiasts the product they need to replace their smart watches with a user-friendly lifestyle Optimizer innovated with applications for their daily enjoyment, protection, and self actualization.

Wearable Visual Communicator

"Techwrist delivers the missing piece in the wearable devices sector and allows for real time optimum value realization by consumers who patronize and use such devices. Techwrist offers consumer access to our Ai powered network and the security needed to optimize their everyday lifestyle with the applications on the device," stated Dr. Kenneth Ekow Andam, Chairman and CEO of WorldVuer Inc.

Next Generation Wearable LIFE OPTIMIZER:

The WorldVuer Techwrist is a wearable life preservation (LP) visual communicator. The device maps a person's daily activities in real-time and identifies interactions that have negative or positive causality effects on them. This innovative mapping capability is achieved using the Techwrist's gps pulse differential monitoring technology. This pulse differential monitoring system allows the device to document and store user engagements with their living environment daily. Such data is run through an inference engine on WorldVuers LifePaas service network to generate a data stack of advisory directives that the Techwrist owner can review and use to make

Techwrist is an attestation of our commitment to develop secure life optimization technologies that contribute to the daily improvement of our product users lifestyle. Techwrist optimizes life."

Dr. Kenneth Ekow Andam

informed decisions on how to preserve and improve their lifestyle. When such advisory datapoints are adhered to by the Techwrist owner monthly, the products advisory Ai avatar guide is able to establish a user predictability quotient which will assist the device users to avoid engagements that can be detrimental to their everyday living.

"Using our integrated Ai management product branded as our Life Preservation as a Service (LifePaas) platform, Techwrist allows for trusted data mapping using the platforms Intelligent Interoperable data instances

manager," stated Mr. Keith McAllister, Chief Globalization Officer (CGO) of WorldVuer Inc.

Some key features of Techwrist include:

- Establishing digital representation of activities.
- Monitoring changes in interactions with things around them.
- Optimizing physical and mental lifestyle
- Simplifying life.
- Wearable life preservation unit (LPU).
- Life extensible processing to guide users on their everyday life choices.
- Research and development in advanced genomics and hyper genetics.

Ai Powered Techwrist Life Preservation as a Service Platform Network:

The Techwrist Ai powered Life Preservation as a service (LifePaas) platform allows users to access their everyday activities through our LifePaas data instance module that captures and preserves all their data into their personalized secure access portal within the LifePaas platform.

The Techwrist LifePaas platform is powered by the joint collaboration company established by WorldVuer and ETT|iByond to develop the world's first Ai operating system known as WiOS. The modularize data instances built into Techwrist is the first advancement of the operating framework that WorldVuer iByond is developing.

"Since the announcement of our collaboration with WorldVuer to establish the joint development company WorldVuer iByond which has been assigned the task to build the world's first Ai operating system, derivatives of our Ai platform implemented into the Techwrist has proven successful and has confirmed our commitment to establishing the world's most advanced Ai Interoperable platform for developers worldwide to publish their own innovations unto our platform," stated Mr. Christopher Condon, chairman and CEO of Economic

Transformation Technologies (ETT | iByond™).

WorldVuer ignited the interactive visual communication (VC) era through its vuefon and seenmail platforms in 2006 and have now transitioned its software and hardware development capabilities into the innovation of [Ai driven](#) products and services that it markets to its global consumers and clients. WorldVuer is dedicated to bringing the best personal computing experience to innovative professionals, students, educators, creative developers, enterprises, and consumers around the world through its innovative hardware, software and Internet offerings. Techwrist allows WorldVuers products and services consumers to touch their world while preserving their most value asset in their life which is their health.
