The implementation of KIDaccount's VMS will enhance the safety and security of over 30,000 students and staff members within the Santa Rosa School District. The system is designed to efficiently manage and track visitors, ensuring that only authorized individuals have access to school premises. Additional features of the VMS include real-time visitor logging, instant background checks, and customizable access permissions, all aimed at bolstering school security and providing peace of mind to parents, teachers, and administrators.

Keith Petty, President and CEO of KIDaccount, expressed his enthusiasm for the partnership. "We are thrilled to work with the Santa Rosa School District to bring our Visitor Management System and other integrated safety modules to their schools," said Petty. "Our mission is to create a safer and more secure learning environment for students and staff, and we are

confident that our safety platform will significantly contribute to achieving this goal."

An official from the Santa Rosa School District also expressed enthusiasm for the new partnership. "The safety and security of our students and staff are our top priorities," said Nadia Colin, Public Information and Family and Community Outreach Officer of the Santa Rosa School District. "By implementing KIDaccount's Visitor Management System, we are taking a significant step forward in enhancing the protective measures across our schools. This system will help us ensure that our campuses remain safe environments conducive to learning."

The roll-out of the Visitor Management System will begin immediately, with full implementation expected to be completed by the start of the upcoming school year. Training sessions for school administrators and staff will be conducted to ensure seamless integration and optimal use of the system.
