

# Environmental Design Inc. Celebrates Over 40 Years of Quality and Precision in Tree Transplanting

---

Aledo, TX – Environmental Design Inc., a leading service provider for specimen tree supply and transplantation in the United States and throughout the world, is thrilled to announce its celebration of over 40 years of providing quality and precision in Tree Transplanting that ensures the health and longevity of each tree.

With a range of highly acclaimed services, such as large tree sourcing and procurement, project-specific custom growing, and in-box/in-ground tree nursery establishment, Environmental Design Inc. has consistently demonstrated its expertise in handling large and complex tree transplants, using innovative equipment and methods to implement the best solutions for clients. The top tree relocation company hopes to continue offering its premier tree transplanting and moving services for many more years to come.

“We move trees for private estates, museums, hotels and resorts, universities, and golf courses. We are proud to have participated in the development of some of the most distinctive landscapes throughout the USA and the world by providing the highest quality tree transplanting and supply services.”

Environmental Design Inc. comprises a team of skilled moving technicians trained in its patented processes, including its ArborLift®. This enables them to design and implement Large Tree Transplanting solutions that are specifically customized to clients’ unique preferences while maintaining the health of the tree.

The tree-moving experts are experienced in moving large trees, and their team utilizes tree spades ranging from 65 inches to 168 inches to offer clients the opportunity to bypass the 100-year waiting period it takes to grow large, mature trees. Additionally, Environmental Design’s tree boxing and relocation programs guarantee that trees are excellently kept while in transport to ensure maximum vitality and longevity wherever they are moved to.

Environmental Design Inc. helps developers preserve native forests in ecologically sensitive regions and protect historical trees that serve as important landmarks. They also assist clients with relocating trees to enhance property values. The company works closely with clients to coordinate moving timelines with the construction schedules of their landscape design projects. Environmental Design Inc. has more experience and expertise in large tree transplanting than any other company in the world. They have a specialist team dedicated to developing tailored strategies to understand clients’ unique visions while ensuring the safe relocation of their trees. As a result, Environmental Design Inc. has become renowned as the premier tree transplanting service in the United States.

Environmental Design Inc. encourages individuals searching for professional tree moving

services throughout the U.S. to fill out the contact form via its website to hear back from a team member today.

About Environmental Design Inc.
