Deception Technology Market Overview

Sometimes cybersecurity threat actors themselves resort to deception. An example of this is when attackers recycle an IP address from another, lower-level threat actor, as in this example. This makes dangerous attackers look like a lower-priority, more common threat.

Market Trends:

- Complexity in implementing and managing deception technology
- The deployment of decoys generate false alarms, leading to operational disruptions and resource wastage if not properly managed

Market Drivers:

- Escalating cyber threats
- Increasing compliance requirements regulatory bodies worldwide
- Growing awareness of deception technology create opportunities for market growth and innovation
- Integration with existing security infrastructure and collaboration with other cybersecurity solutions
