Rise in the prevalence of male infertility and increase in awareness regarding fertility testing in both the developed and developing countries drive the growth of the global semen analysis market. On the other hand, lack of awareness about semen analysis in economically poor countries impedes growth to some extent. However, rise in sales of male fertility testing kits on the online platform and mounting growth potential in emerging economies have paved the way for lucrative opportunities in the industry.

The report provides a detailed analysis of the top investment pockets, top winning strategies, drivers & opportunities, market size & estimations, competitive landscape, and evolving market

semen analysis market share in 2021, and is expected to lead the trail by 2031. The same segment would also garner the fastest CAGR of 4.7% during the forecast period. This is attributed to increase in the infertility rates among population and rise in the number of IVF and vasectomy procedures performed in fertility centers.

Based on region, Asia-Pacific held the major share in 2021, generating more than one-third of the global semen analysis market. This is due to surge in infertility cases and rise in awareness regarding semen analysis testing among the population. The market across LAMEA, on the other hand, would cite the fastest CAGR of 5.6% throughout the forecast period, owing to increase in adoption of semen analysis tests across the province.
