(United States), Payoneer (United States), 2CheckOut (United States), Opayo (United Kingdom), Stripe, Inc (United States), Braintree (United States), American Express Company (United States), PayPal H

#### Definition:

Third-party payment typically refers to a financial transaction where a party not directly involved in a contract or agreement makes a payment on behalf of one of the parties involved. This can occur in various contexts and industries, and the third party could be acting as an intermediary, facilitator, or guarantor.

#### Market Trends:

- The use of mobile devices for payments, including mobile wallets and apps, has been on the rise. Consumers increasingly prefer the convenience of making payments through their smartphones, and this trend is likely to continue.

#### Market Drivers:

- The primary driver for the adoption of third-party payment services is the convenience they offer. Users appreciate the ease of making transactions, whether online or offline, without the need for physical cash or cards.

#### Market Opportunities:

- Third-party payment providers have opportunities to expand their services globally, especially in regions where digital payments are still evolving. Collaborations with local partners and compliance with regional regulations are essential for success in n
