Growth Driver Of The Capecitabine Market

The increasing incidence of cancer is expected to propel the growth of the capecitabine market going forward. Cancer is a broad category of illnesses that can develop in any organ or tissue in the body when aberrant cells proliferate uncontrollably, cross their usual boundaries, and either spread to other organs or invade neighboring body parts. Capecitabine is used as a

chemotherapeutic medication in cancer treatment, where it is enzymatically converted into the antimetabolite fluorouracil in the tumor, inhibiting DNA synthesis and slowing tumor tissue growth.
