

Cogent Sourcing Emerges as a Reputable Procurement Platform for Aviation Standard Parts, Addressing Rising Global Demand

Cogent Sourcing emerges as a notable platform for aviation standard parts, addressing global demand with an expansive selection of BAC, MS, NAS, and AS parts.

ANAHEIM, CALIFORNIA, UNITED STATES, July 17, 2024

/EINPresswire.com/ -- In response to the growing need for reliable and quality aviation parts, ASAP

Semiconductor proudly announces its

continued commitment to maintaining an extensive selection of products and streamlined fulfillment solutions on its online platform, Cogent Sourcing. This initiative comes at a time in which supply chains are continuing to pick up and demand for aviation standard parts remains

high, offering an ease of search and procurement by featuring an [expanded selection of BAC, MS, NAS, and AS standard part offerings](#) across curated catalogs. The expansion aligns with ASAP Semiconductor's commitment to ensuring accessibility to high-quality aviation components, bolstering the efficiency and safety of aviation operations worldwide.

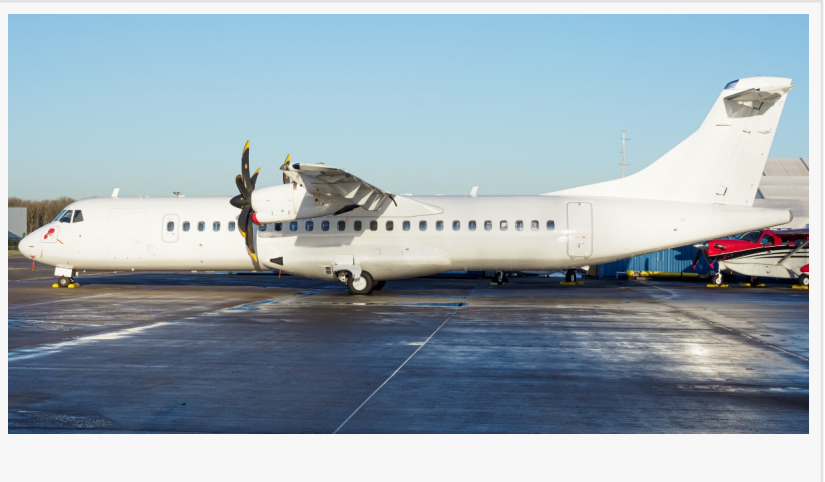

“

As the aerospace industry grows, Cogent Sourcing remains strategically positioned to provide a reliable supply of high-quality aviation standard parts, supporting maintenance and repair operations.”

Joe Faruqui

Aviation standard parts are essential components in the aerospace and defense industries that meet specific requirements or specifications set out by various jurisdictions for objectives like uniformity, quality, interchangeability, performance, and safety. By meeting

rigorous regulatory requirements and approval processes, aviation standard parts are highly advantageous for demanding applications and maintenance, repair, and overhaul (MRO) operations. In other instances, procuring parts that meet specific standards or specifications may simply be a requirement. As a result, ASAP Semiconductor aims to support these varying

needs by offering diverse options.

BAC standard parts, which meet objectives set out by the Boeing Aircraft Company, are widely recognized for their reliability and extensive use in Boeing aircraft. These components adhere to strict quality control measures, ensuring optimal performance and safety. Regularly supporting Boeing aircraft and operator needs, Cogent Sourcing has been stocked with a number of BAC standard parts that range from seals and gaskets to structural components and electronics.

MS standard parts, or [Military Standard parts](#), are those that meet the specifications developed by the United States Department of Defense. These components are designed to meet the rigorous demands of military operations, ensuring durability, interchangeability, and high performance in even the most extreme conditions. Companies who manufacture MS standard parts must also comply with robust quality-control expectations, furthering the reliability of such product options.

National Aerospace Standards (NAS) are developed by the Aerospace Industries Association (AIA) and are used across various aircraft types. These parts are designed to meet high-quality standards, ensuring consistency and reliability in aerospace applications. Sourcing items from many global manufacturers, [NAS standard parts](#) on Cogent Sourcing include screws, washers, nuts, bolts, seals, couplings, and many other common options that are used throughout operations.

AS parts, or Aerospace Standard parts, are those that meet certain design, manufacturing, test and acceptance, and uniform identification objectives. With a non-regularity definition of this designation issued by the FAA, these parts adhere to stringent quality and performance standards to ensure they meet the rigorous demands of the aerospace industry. To address global demand for reliable aerospace solutions, AS standard parts stocked on Cogent Sourcing include wires, fasteners, tubing, sealing components, aircraft antennas, and much more.

Owned and operated by part distributor ASAP Semiconductor, Cogent Sourcing leverages the company's purchasing power, market data, and expertise to ensure the availability of high-quality aviation parts that range from factory-new to obsolete condition. The company is also dedicated to maintaining the highest standards of quality and service across its websites, ensuring that every component meets or exceeds industry requirements while also effectively addressing customer needs with prompt solutions.

Furthermore, the expansion of Cogent Sourcing is a testament to ASAP Semiconductor's proactive approach in addressing the evolving needs of the aviation sector. By providing a comprehensive range of aviation standard parts, the platform is equipped to support various aircraft types, including commercial, military, and private jets. This versatility makes Cogent Sourcing an invaluable resource for maintenance providers, repair stations, and aircraft operators alike.

As Cogent Sourcing continues to expand its offerings, ASAP Semiconductor remains committed to innovation and excellence. The company continues to invest in advanced technologies and strategic partnerships to enhance its capabilities and provide cutting-edge solutions to the aviation community through its websites. This forward-thinking approach ensures that Cogent Sourcing remains at the forefront of the industry, meeting the evolving requirements of aviation professionals. About Cogent Sourcing

Cogent Sourcing is a procurement platform with a diverse selection that includes aviation parts, NSN components, IT hardware, and more. As an ASAP Semiconductor website, customers can expect tailored procurement options and consultation from a team of industry experts that are readily available to discuss needs. Cogent Sourcing also provides the benefit of timely delivery and quality-assurance, all while maintaining competitive pricing. See how Cogent Sourcing can address your requirements when you check out the website.
