Growth Driver Of The Enteral Nutrition Market

The increase in the prevalence of chronic disease is expected to drive the demand for enteral nutrition. Chronic or non-communicable diseases (NCDs) are long-term conditions that typically progress slowly and persist over an extended period. It includes cardiovascular diseases, diabetes, respiratory diseases, cancer, chronic kidney disease, neurological diseases, rheumatoid arthritis, and other autoimmune diseases. Enteral nutrition can be used as a supportive measure for patients who have difficulty eating or maintaining adequate nutrition due to the disease or its treatments.

- 3) By Patient Type: Adults, Pediatric
- 4) By Application: Cancer, Critical Care, Diabetes, Gastrointestinal Diseases, Other Applications
- 5) By Distribution Channel: Hospital Pharmacies, Retail Pharmacies, Online Pharmacies

Geographical Insights: North America Leading The Market

North America was the largest region in the enteral nutrition market in 2023. Asia-Pacific is expected to be the fastest-growing region during the forecast period, driven by expanding healthcare facilities and increasing awareness of the benefits of enteral nutrition.

Enteral Nutrition Market Definition

Enteral nutrition refers to a method of delivering nutrition directly into the gastrointestinal (GI) tract, bypassing the oral route through a feeding tube that is inserted either through the nose (nasogastric or nasoenteric tube) or directly into the stomach or small intestine (gastrostomy or jejunostomy tube).

The main products of enteral nutrition are standard enteral nutrition and enteral nutrition for chronic illness. Standard enteral nutrition refers to a type of nutrition that is provided through the gastrointestinal tract via a tube. It is designed to meet the nutritional needs of individuals who are unable to consume adequate amounts of food orally or have a dysfunctional gastrointestinal system. The nutrients include proteins, carbohydrates, multi vitamins, antioxidants, amino acids, fibers, minerals, and others, suitable for adults and pediatrics with cancer, critical care, diabetes, gastrointestinal diseases, and other conditions. The enteral

nutrition is available at hospital pharmacies, retail pharmacies, and online pharmacies.
