Increase in number of criminal activities, surge in interception warrants, and rise in volume of data traffic and security threats drive the growth of the global lawful interception market. Advancements in network technologies and prominence popularity of social media communications create new opportunities in coming years.

The global lawful interception market is segmented into solution, network technology, communication technology, end user, and region. Depending on solution, the market is segmented into devices, software, and services. On the basis of network technology, the market is fragmented into VoIP, WLAN, WiMAX, DSL, PSTN, ISDN, mobile voice telephony, mobile data,

and others. By communication technology, it is segregated into voice communication, video, text messaging, facsimile, digital pictures, data downloads, and file transfer. As per end user, it is classified into government and enterprises. Region wise, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Based on communication content, the voice communication segment held nearly one-third of the global lawful interception market in terms of revenue in 2018, and is projected to maintain its lead status by 2026. This is due to the creation of new technologies and presence of communication platforms by law enforcement agencies. Contrarily, the video segment is expected to portray the largest CAGR of 26.1% from 2019 to 2026, owing to emergence of 3G, 4G, and LTE wireless communications along with rise in number of smartphone users.

Based on network technology, the long-term evolution (LTE) segment is estimated to portray the highest CAGR of 28.4% from 2019 to 2026, owing to high-speed voice and data communication. However, the mobile voice telephony segment accounted for the largest market share in 2018, holding nearly one-fourth of the global lawful interception market, and is estimated to contribute its highest contribution during the forecast period. This is attributed to availability of high-speed internet technologies and utilization of conventional non-data voice calls.

Based on region, North America contributed to more than one-third of the global lawful interception market share in 2018, and is estimated to maintain its dominance throughout the forecast period. This is attributed to rise in the criminal and terrorist activities with extensive usage of internet. However, Asia-Pacific is expected to contribute to the highest CAGR of 24.5% from 2019 to 2026, owing to surge in adoption of efficient telecommunication technologies in various countries including Korea, Japan, and China.

The key players profiled in the lawful interception market analysis are AQSACOM Innovating Intelligence, BAE Systems, Cisco Systems, Inc., Fire Eye, Incognito software system Inc., JSI Telecom, NICE Systems, SS8 Incorporation, Siemens AG, and Utimaco GmbH. These players have adopted various strategies to increase their market penetration and strengthen their position in the lawful interception industry.
